🕒 75 hours

Fees – 1,000 Euros

Who should apply?

Students looking to study engineering after high school

This course is specifically designed to improve academic French skills, in order to prepare students for higher studies at ESIGELEC. Upon successful completion, students will have obtained the language proficiency for our 5-year engineering degree programme.

The online and on-campus modules are mandatory for students applying to the 5-year Integrated Master's programme.

Students applying for our English-taught Master's programmes

This course is also beneficial for students applying to our Master's program. Having a working knowledge of French will elevate the everyday experience and the chances of procuring good internships and job opportunities in France.

The online modules A1 and A2 are recommended for students applying to the 2-year English-taught Master's programmes.

The common denominator!

29 countries

in the world officially
speak French

300 million

people across the world
can converse in French

6th most spoken

language globally

2nd most studied

language worldwide

Learning the French language will be worth your while!

Course levels

A1

Start Small

- Beginner

At this level, you understand and know how to use simple and familiar expressions that help you satisfy basic needs (e.g. ordering a coffee or a croissant). You know how to answer simple questions, like - what is your name?, or where do you live?.

A2

Gain Momentum

- Elementary level

In this level, you gain a broader vocabulary in French and can get simple things done. You are definitely ready to order a coffee in France! You understand common sentences that are widely used (e.g. personal information, questions about shopping, or about your immediate environment). You successfully communicate to accomplish simple tasks, converse on familiar topics, or attend to matters of immediate need.

B1

Express Yourself

- Intermediate level

You understand anything that is said clearly and refers to standard terms (work, education, hobbies, etc). At this stage, travelling through a French speaking country should be easy and unproblematic. You successfully converse about familiar topics and things you are interested in. You can describe events, experiences and goals, and can provide arguments to support your ideas.

What to expect

Doable.

A language learning course designed to help you acquire a language, alongside your regular academics.

Valuable.

Language proficiency that will enable you to successfully undertake higher studies in France, with French as the medium of instruction.

Reliable.

French language trainers who are intuitive and experienced, and can cater to your educational background and cultural perspective.

Why choose this course?

Learn a foreign language and prepare to study in France.

Meet the French language requirements for entry into the prestigious 5-year French Engineering Programme at ESIGELEC, a top French Grande Ecole (Graduate school).

Learn to operate effectively in a French Graduate School of Engineering, with topics including study techniques, and expectations of student to lecturer relations.

Gain a working knowledge of French when applying to our Master's program, to help land good internships and jobs in France.

You will:

gather practical skills such as note-taking strategies and how to reference

develop your academic writing skills so you can produce quality essays

build your confidence speaking in an academic setting and giving presentations

be better prepared to achieve academic success in your further studies at ESIGELEC

Why study in France?

Beyond the fashion and cuisine

Get the French Edge

Affordable tuition fees

Quality higher education

Outstanding R&D opportunities

A leading start-up nation

Home to notable international corporations

A world-class economic power

Young talent valued in innovation and entrepreneurship sectors

Explore the French lifestyle, culture and diversity
